

PUBLIC ANNOUNCEMENT

The Township of La Vallee is pleased to announce that it has entered into a Disposal Agreement with Sanexen Environmental Services Inc. to take solid non-hazardous waste material to our landfill site from the Couchiching First Nation Remediation project.

This material has been approved by Ministry of the Environment to be used to cap our landfill which will reduce the future landfill closure costs substantially.

Transportation of this material will take place on weekdays from June to September, 2023. We will be reducing the speed limit on Tausendfrende Road during this time, due to the increased truck traffic. We urge residents to use extra caution during this time.

This is an excellent opportunity for our municipality to generate extra revenue for future projects and improvements.
